

The NOI mandatory recording proposal is unfair to small market independant broadcasters. The expense of such a burden would be prohibitive for my AM & FM stations. I believe in responsible broadcasting and since we are licensed as public trustees to serve the public interest - those that fail to be responsible should carry this burden as they have allowed things to get out of control on their airwaves. Knowing they will be required to start a process to show they can be accountable would be appropriate. Please don't burden the whole industry for the actions of a few.
